

# Polypropylene Finishes

**ezfurn**  
furniture made easy.

## FEATURES:

### *UV Stabilised*

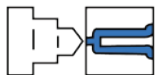

Stabilizer has been added to the resin to allow it to protect the substance from the long-term degradation from UV light.

### *Recyclable*

Polypropylene is pure, and is not contaminated by other materials. Thanks to this particular feature, it can be separated by colour and reprocessed during the recovery stage.

### *Full Injection Mold*

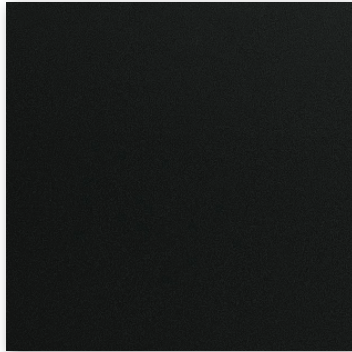

Injection molding is a method to obtain molded products by injecting plastic materials molten by heat into a mold, and then cooling and solidifying them. This method boasts speed, efficiency, consistency and enhanced strength all while creating less waste.

### *Factory Testing*

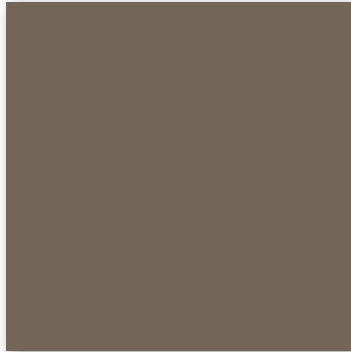

The factory that produces furniture made from polypropylene Nardi and Scab both conduct a number of tests with reports. This high level of quality control gives you piece of mind when buying these products.
